The Butterfly WebSite - butterfly photos, butterfly ...

Simply put, a butterfly is a winged insect that undergoes complete metamorphosis (in other words, goes from egg to caterpillar to pupa to adult). Butterflies belong to a large group of insects called the Lepidoptera, which includes both butterflies and moths. They have three body segments: the head, the abdomen and the thorax.

Butterfly Identification Guide: 25 Types of Butterflies ...

Butterflies are beautiful, flying insects with large scaly wings. Like all insects, they have six jointed legs, 3 body parts, a pair of antennae, compound eyes, and an exoskeleton. The three body parts are the head, thorax (the chest), and abdomen (the tail end). The butterfly's body is covered by tiny sensory hairs.
