Transmission fluid is often taken for granted, but it is the main element in a modern vehicle. While it doesn't get as much attention as motor oil, having the right amount of transmission fluid is just as vital. While the transmission fluid should never be low, there are some issues that can cause this problem.

2 speed powerglide transmission fluid

Determine the amount of fluid to add by measuring the amount drained, initially add 1/3 of that amount. Then, with the engine running, add 1/2-pint at a time (shifting through each gear position between additions) until the level is correct. It is important to not overfill the transmission. Manual transmission Ford 3-speed: 3.5 pints
