## **Management, Measurement & Verification of Performance ...**

Performance measurement is a subprocess of performance management that focuses on the identification, tracking and communication of performance results by the use of performance indicators. It deals with the evaluation of results , while performance management deals with taking action based on the results of the evaluation and ensuring the target results are achieved.

## **KPI 101 - 2. Performance management and measurement**

Measurement of the organization's performance represents a good practice and is an integral part of the organization's management in the accomplishment of its strategies and objectives. The BSC and associated KPIs are treated in practice as a process that supports the reviewing and changes of the measurement system in relation to changes in the business environment of the organization.

## **Management Measurement And Verification Of Performance ...**

Performance measurement and performance management may sound similar, but while they are complementary to one another, they are entirely separate strategic practices.. The Balanced Scorecard creators, Drs. Robert S. Kaplan and David P. Norton, played a large role in championing these terms. In 1996, Kaplan and Norton published The Balanced Scorecard: Translating Strategy into Action.
