Ramadan Fasting And Educational Outcomes

If fasting is the main mechanism through which Ramadan affects academic performance, our results are informative about the relation between nutrition and educational outcomes. Based on previous research, we hypothesize that observing Ramadan, and especially observing the fast, will have a negative impact on participants' academic achievement.

Ramadan, fasting and educational outcomes

The primary outcome was fasting behaviour, defined as fasting or not fasting. Secondary outcomes of this study were preterm delivery and birth weight as they had previously been reported to be associated with Ramadan fasting [2–4, 8]. Preterm delivery (PTD), was defined as birth before gestational week 37 + 0.

Experiences and outcomes of maternal Ramadan fasting ...

The fasting behaviours of pregnant Muslim women resident in Western countries remain largely unexplored and relationships between fasting behaviour and offspring health outcomes remain contentious. This study was undertaken to assess the prevalence, characteristics of fasting behaviours and offspring health outcomes in Asian and Asian British Muslim women within a UK birth cohort.

Experiences and outcomes of maternal Ramadan fasting ...

The education departments of Berlin and the United Kingdom have tried to discourage students from fasting during Ramadan, as they claim that not eating or drinking can lead to concentration problems and bad grades. Ramadan fasting has also been associated with loss of workplace productivity by 35 to 50%.

Economics of Education Review

There are controversies over the effects of Ramadan fasting on pregnancy outcomes, and women's perspectives of fasting are diverse. This study aimed to assess the perspectives and pregnancy outcomes of maternal Ramadan fasting in the second trimester of pregnancy. A case-control study was conducted at Hawler Maternity Teaching Hospital of Erbil, Iraq from October 2017 to January 2018.

Perspectives and pregnancy outcomes of maternal Ramadan ...

Background Ramadan fasting is compulsory for all healthy adult Muslims. Although sick people are exempted from Ramadan fasting, some patients such as hemodialysis patients prefer to fast during Ramadan. The effect of Ramadan fasting on clinical outcomes and biochemical markers among hemodialysis patients is not clear. The aim of this study was to examine the effects of daily Ramadan fasting ...

The effects of Ramadan fasting on clinical and biochemical ...

Ramadan fasting (RF) is when millions of Muslims abstain from food and drink from dawn until sunset. 1 Patients with chronic conditions who are eligible for exemption sometimes insist on fasting without seeking medical advice. 2 To our knowledge, the effects of RF on myasthenia gravis (MG) have never been studied, and neurologists usually refrain from advising patients with MG to fast because ...
